This 175,000-square-foot headquarters and 600-car parking garage opened in Dec. 2011. Designed for LEED Gold Certification, its sustainable features include "green" roofs and an innovative approach to stormwater management.

While limestone and serpentine shapes on the lower levels relate to the meandering waterway and park nearby, the shape of the upper floors respects the downtown context. The "glass box" of workstations on the upper levels provide views and abundant natural light for employees.
TECHNICAL DETAILS OF THE PROJECT

BUILDING CLIENT
Assurity Life Headquarters

ARCHITECTS
The Clark Enersen Partners

WINDOW MANUFACTURER
Manko Windows

IG MANUFACTURER
Manko Windows

TYPES OF GLAZINGS AND QUANTITIES
45,000 sq ft of high performance SN 62 low e insulating glass edged with Super Spacer TriSeal.
