

KENT STATE PERFORMING ARTS CENTER NEW PHILADELPHIA, OH

A sculptural statement of education and artistic expression, the 50,000 sf Kent State University Tuscarawas (New Philadelphia, Ohio) Performing Arts Center (PAC) will culturally and financially invigorate its community and campus, while standing as a regional landmark symbolizing the progressive aspirations of the Tuscarawas Valley.

A glass and metal façade curves around the fly tower, clad in pre-cast concrete and articulated with aluminum fins. The sense of fluid movement through material echoes the activity within. The design responds to multiple vantage points from the campus and the surrounding community, and the swooping metal component focuses internal views to adjacent campus landmarks.

TECHNICAL DETAILS OF THE PROJECT

BUILDING OWNER	Kent State University
ARCHITECTS	Schorr Architects; Legat Architects
GENERAL CONTRACTOR	Dunlop Johnston
GLAZING CONTRACTOR	Cherokee Glass
IG SUPPLIER	Arch Aluminum
TYPES OF GLAZINGS AND QUANTITIES	Silicone spacer IG
