

Making old, damaged or discolored sill replacement easier than ever.

The new Quanex Door Sill Replacement Decks are the latest release in a long line of products to help meet your door needs. Using roll formed technology and anodized coating, Quanex's new Sill Replacement Decks offer an economical and visually appealing solution for damaged or discolored thresholds without needing to replace the entire unit, which is often an expensive and timely solution.

Flexibility: Offered in 6" x 74", Quanex's Door Sill Replacement Decks allow you to easily customize them in order to fit many configurations (French, CSL, Patio, Singles). The Easy-to-cut score patterns allow you to simply adjust the width to fit your existing sill.

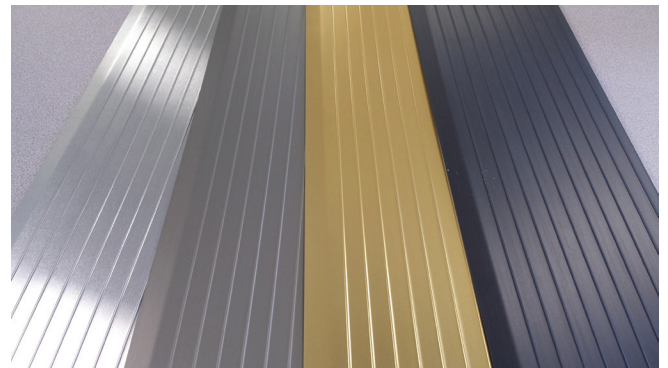

Durability: Featuring an anodized coating, these door sill replacement decks are designed to withstand weather, sunlight and other factors that can cause wear and tear on your threshold. Additionally, the sill is applied over the existing threshold, resulting in increased stability.

Affordability: Developed using roll formed aluminum that allows the door sill to be produced economically, without compromising durability. In fact, you can renew a 3/0 Sill for as little as \$7.50!

Simple Installation

Along with the flexibility, durability and affordability comes simple installation. The door sill replacement decks are applied over the existing threshold, resulting in a seamless transition. The sill replacement decks also come with a simple step-by-step instruction sheet to ensure a smooth installation.

Finish Options

The Quanex Door Sill Replacement Decks come in a variety of finish options, including Mill, Satin Nickel, Bright Brass, & Bronze.
