

We Take the Pain Out of Grilles

Achieve a classic appearance while improving production efficiencies with Quanex Building Products' pre-fabricated window and door grilles.

With **Quanex Building Products'** window and door grilles, you can significantly reduce the time required to add the true divided lite appearance your customers desire because **we do the work for you.**

Simply choose from our array of options and finishes and we will ship our custom-made grilles ready to install in your units. We provide engineered solutions to meet your unique needs - from electronic ordering to custom configurations to sequenced and kitted shipping options. We are a partner you can rely on.

Materials: Available in wood, aluminum and MikronWood™ composite, our grilles can be made to **suit your design style** with options that **meet your production style**, including lineals, **end coped to match your glass surround** and **dadoed intersections** - making proper installation easy and accurate. In addition to custom designs, Quanex stocks over 20 'ready-to-install' profiles in a variety of sizes down to 3/16-inch thickness.

Species: Wood grilles are available in more than 30 species, including pine, oak, maple, alder, fir, and mahogany to name just a few.

Finishes: Both the wood and aluminum grilles can be left unfinished or painted to any color that meets your needs using waterborne paints. Quanex Building Products also offers waterborne staining for wood grilles. The MikronWood™ material is available in White, adobe, and bronze.

Fasteners: Choose the fastener type that best suits your manufacturing process. Options include permanent tape, slide pin, or any variety of typical grille fasteners.

Quality Guaranteed: With extreme attention to even the smallest details, Quanex Building Products is proud to provide 99.8% on-time delivery and 99.8% first-time quality to customers. All grilles are shipped knocked down in compact tubes to keep freight costs to a minimum.

Give your customers the distinctive look they desire. Contact Quanex Building Products' at 763-231-4000 or visit www.quanex.com to learn more about Quanex pre-fabricated window and door grilles for OEMs.

Aesthetics & Efficiency:

Three ways to add modernized grilles to your product mix.

Traditional true divided lite grille products are constructed of individual panes of glass between the grilles, giving the home a stylish look – and unwanted drafts.

Thankfully, as window technology has progressed, so have the grille options. Today, more efficient options exist to give your customers the appearance and the efficiencies they desire:

Full Divided Lite Grilles: Grilles are attached to the inside and outside of the insulating glass window using a strong, permanent adhesive. To give the window a realistic look, a spacer is placed between the two panes of glass to cast a shadow reminiscent of true divided lite windows.

Simulated Divided Lite Grilles: Like the full divided lite options, simulated divided lite grilles are permanently applied to both sides of the insulating glass window system. The difference is that no spacer is placed between the panes of glass.

Removable Grilles: Grilles are attached the inside of the window only with a number of fastening options that enable homeowners to remove them for cleaning the glass.

Whether you call them muntin bars, grids or grilles, these design elements add a traditional flair to any home. Quanex can assist you with any of these modern and efficient grille options – pre-fabricated to your specifications.
