

FOR IMMEDIATE RELEASE:

## Quanex's Duralite® Delivers Proven High-Performance in a Single-Seal System

**HOUSTON, Oct. 31, 2023 (NYSE: NX)** — Backed by a longstanding history in warm-edge spacer technology, Quanex's flexible, nonmetal-based Duralite® enables insulating glass (IG) manufacturers everywhere to achieve superior efficiency and performance.

Duralite is a high-quality single-seal spacer solution ideally suited for high-volume operations where productivity is critical. Duralite comes fully preassembled with proven Quanex components, sealant, spacer and desiccant, and its one-step sealing process helps manufacturers realize improved condensation resistance and warmer edge-of-glass temperature for a higher-performing IG unit.

"Duralite is a dependable and efficient solution for IG producers everywhere," said Larry Johnson, vice president of sales, North American Fenestration, Quanex. "We're excited to help our customers achieve new possibilities with Duralite and the rest of our warm-edge spacers at this year's GlassBuild show."

More than 10 billion feet of Quanex warm-edge spacer have been used in homes, buildings, solar panels and refrigeration units around the world, with more than 20 Quanex facilities and international shipping capabilities to provide customers with consistent, quality products and localized support.
