

FOR IMMEDIATE RELEASE:

Quanex's Mikron AW-Rated System C3-11300™ Offers Excellence for Every Commercial Application

HOUSTON, Oct. 31, 2023 (NYSE: NX) — Achieve outstanding performance and unmatched energy efficiency for commercial applications with Quanex's Mikron AW-Rated System C3-11300™.

Mikron® C3-11300 meets the needs of mid- and high-rise commercial buildings with a mix of strength, energy performance and aesthetics. This versatile window profile delivers higher structural performance and thermal efficiencies, with operable windows accepting a full range of standard and concealed multilock hardware, and all windows accommodating multiple reinforcing material options. It was the first operable nonmetallic window and door system to meet all requirements for AW ratings per the North American Fenestration Standard and remains the premium choice for commercial applications where excellent thermal performance is a critical requirement.

“The Mikron C3-11300 offers building professionals an ideal way to meet evolving needs in applications around the world,” said Eric Thompson, national account manager, North American Fenestration, Quanex. “With a variety of available configurations, we can help our customers stay innovative in building designs while ensuring those living in them will have the ultimate comfort and environmental health.”

The Mikron C3-11300 system includes Quanex's MikronBlend®, a proprietary vinyl compound, offering optimal weathering and superior durability, even in the most intense UV, temperature and salt air environments. It also features Quanex's SuperCapSR™, a patented, coextruded color technology that absorbs less heat to prevent heat-related profile distortion and is 12 times more scratch resistant and durable than painted vinyl.

“This window system was designed to meet our customers' needs and exceed the demands of the industry,” Thompson said. “Today, the system is ideal for a variety of uses, providing our customers with the design flexibility they need without sacrificing performance. And it's backed by Mikron's 50-year heritage of exceeding customer expectations with high performance.”
